Key Qualification Information

Qualification number:	610/6084/7
Operational start date:	23rd September 2025
Total Qualification Time (TQT):	4 hours
Guided Learning Hours (GLH):	3 hours
Number of units:	1 mandatory unit
Credit value:	1
Assessment methods:	Practical assessment – 4 completed throughout the course

Qualsafe Awards

Not only is Qualsafe Awards (QA) one of the largest Awarding Organisations (AO) in the UK, we are also the biggest AO for First Aid qualifications, making us an extremely trusted and recognisable name that employers look for when selecting a training provider.

We are recognised and regulated by the Office of Qualifications and Examinations Regulation (Ofqual), Qualifications Wales and the Northern Ireland Council for the Curriculum, Examinations and Assessment (CCEA). This means we can offer Centres an extensive range of qualification suites including First Aid; Prehospital Care; Health and Safety; Mental Health First Aid; Licensing; Food Safety; Fire Safety; Education and Training; Manual Handling; Health and Social Care; and Sport and Leisure.

With a specialist team of subject matter experts on hand to support our Centres, including A&E Consultants, doctors, paramedics, nurses, physiotherapists and specialists in other sectors such as mental health, you can be confident that you are truly working with the industry experts.

Qualification overview

This qualification forms part of the QA First Aid suite of qualifications. The qualification and learning outcomes are based on the recommendations of:

- The Resuscitation Council (UK)
- A distinguished panel of experts in emergency medical care

This qualification should enable Learners to attain the practical competencies needed to provide basic life support (BLS), safely use an automated external defibrillator (AED) and manage a casualty with anaphylaxis.

This qualification specification provides information for Centres and Learners about the delivery of the Qualsafe Level 3 Award in Adult BLS, AED and Management of Anaphylaxis (RQF) and includes the unit information, assessment methods and quality assurance arrangements.

Objective

The objective of the qualification is to benefit Learners by preparing them to provide BLS interventions, safely use an AED and provide treatment for anaphylaxis.

Intended audience

This qualification is for people who have a specific interest or responsibility at work, or in voluntary and community activities, who may need to provide BLS interventions, safely use an AED and manage a casualty suffering from anaphylaxis.

Structure

This qualification contains 1 mandatory unit with a Total Qualification Time (TQT) of 4 hours. Full details of this are in *Appendix 1*.

Learners must complete all assessments in the unit successfully within the registration period to achieve the qualification. The maximum period to achieve this qualification, including any referrals is 3 weeks.

TQT is the total number of hours required for a Learner to achieve this qualification. It has 2 elements:

- Guided Learning Hours (GLH) is the time a Learner is being taught and assessed under the immediate guidance of a Trainer/Assessor, which for this qualification is 3 GLH, and

- The number of hours a Learner will reasonably be likely to spend in preparation and study as directed by, but not under the immediate guidance or supervision of a Trainer, e.g. pre-course reading, which for this qualification is 1 hour

Recognition of Prior Learning

Recognition of Prior Learning (RPL) is a process for recognising any previous learning undertaken or assessments attained by a Learner. The Learner must prove they have met some or all the learning outcomes or assessment criteria for this qualification before RPL can be considered.

Any evidence submitted as RPL must be, valid, authentic, reliable, current and specific.

In some cases, Centres may need to produce mappings against QA learning outcomes and assessment criteria to confirm comparability of qualification certificates or evidence being submitted. Mapping templates created by QA must be used for this process. Please see the *QA Recognition of Prior Learning (RPL) Policy* for further details.

RPL is considered for this qualification. The potential outcomes could include reduction or exemption of:

- Learning outcomes or GLH
- Assessments

RPL for this qualification **must** be approved by QA prior to implementation. Note: Charges may apply. Please refer to the *QA Fees and Charges List*.

Entry requirements

Learners must be at least 14 years old on the first day of the training and be able to perform practical tasks at floor level. There are no other formal entry requirements but we strongly recommend that Learners have a minimum of Level 1 in literacy and numeracy or equivalent.

Other course requirements

Due to the practical nature of this course, Learners should wear appropriate clothing and footwear, e.g. trousers and flat footwear.

Progression

The Qualsafe Level 3 Award in Adult BLS, AED and Management of Anaphylaxis (RQF) may be used towards other qualifications at the same and higher level, plus aid career progression in a relevant profession.

Requalification requirements

This qualification is valid for a period of 3 years. The Learner needs to retake the qualification before the certificate expiry date to remain qualified.

Qualification approval requirements

QA requires the Centre:

- To have appropriate policies, systems and procedures in place
- To appoint suitable individuals from their personnel team to train, assess and quality assure their QA qualifications
- To have suitable and adequate venues, equipment and learning resources

In order to secure and maintain approval from QA, Centres need a minimum staffing requirement for each qualification they deliver, which for this qualification is:

One Trainer/Assessor	Responsible for the delivery and assessment of qualifications
One Internal Quality Assurer	Responsible for quality assuring the delivery and assessment of this qualification

QA requires the Centre staff to read and understand QA's key policies and procedures, and to abide by their contents.

Trainer

All Trainers should have the skills, knowledge and experience to be able to teach and demonstrate the subject. Each Trainer must be approved by Qualsafe Awards and provide evidence of:

1. A first aid at work qualification/medical registration as shown in *Appendix 2*
2. An acceptable teaching/training qualification as shown in *Appendix 3*
3. An acceptable log/record of teaching first aid as shown in *Appendix 2*

Trainers are expected to keep up to date with the subject area and provide evidence of continuing professional development (CPD).

Assessor

All Assessors should have the skills, knowledge and experience to be able to assess the subject. Each Assessor must be approved by Qualsafe Awards and provide evidence of:

1. A first aid at work qualification/medical registration as shown in *Appendix 2*
2. An acceptable assessing qualification as shown in *Appendix 3* **or** attendance at relevant CPD training with an Awarding Organisation (AO)
3. An acceptable log/record of assessing first aid as shown in *Appendix 2*

There is no requirement for a separate Assessor when delivering this qualification. Trainers can perform the role of both Trainer and Assessor providing they meet the requirements for each role.

Assessors are expected to keep up to date with the subject area and provide evidence of CPD.

Internal Quality Assurers

Internal Quality Assurers (IQAs) of this qualification must have knowledge and competency in first aid as well as knowledge and competency in internal quality assurance. Each IQA must be approved by Qualsafe Awards and provide evidence of:

1. A first aid at work qualification/medical registration as shown in *Appendix 2*

2. An acceptable internal quality assurance qualification as shown in *Appendix 4* **or** relevant CPD training with an Awarding Organisation (AO)

IQAs are expected to keep up to date with the subject area and provide evidence of CPD.

They must also:

- Have knowledge of the requirements of the qualification they are quality assuring at the time the assessment is taking place
- Have knowledge and understanding of the role of IQAs
- Attend training delivery and observe assessments being carried out
- Carry out other related internal quality assurance

Full details of the Centre's requirements for internal quality assurance are in the *QA Centre Assessment Standards Scrutiny (CASS) Guidance*.

Note: IQAs cannot quality assure a course for which they were the Trainer and/or Assessor.

Venue and equipment

Quality training involves using premises conducive to learning and it is a Centre's responsibility to make sure all venues used for training and assessment purposes are suitable and adequate – whether these are hired or in-house training rooms. They must also comply with all current legislation.

In addition, it is important to use a wide range of equipment and learning resources to support delivery.

As a minimum, Centres must make sure their venues, equipment and other resources include:

Area:	Requirements:
Resuscitation manikins	Provide a minimum ratio of 1 manikin to every 4 Learners to facilitate training and assessment of rescue breaths, chest compressions and Automated External Defibrillation (AED) pad placement.
Hygiene	Sufficient procedures to maintain hygiene when using resuscitation manikins and other training equipment.
Audio visual (AV) equipment and training aids	Sufficient AV equipment and training aids to facilitate learning using varying teaching methods.
Learning materials	Provide Learners with clear and accurate reference books/handouts covering the topics included in the qualification. Learners should have access to these reference materials for the validity of their qualification.
Defibrillator trainers	Provide a minimum of 1 AED trainer to every 4 Learners. If fewer AED trainers are provided, adjust learning hours/lesson plans accordingly to make sure Learners are not disadvantaged.
Adrenaline auto-injector (AAI) training devices	A selection of adrenaline auto-injector training devices to facilitate training and assessment. The minimum should include one of the following: <ul style="list-style-type: none">• Jext• EpiPen
Training venue	The training venue must meet acceptable health and safety standards and be conducive to learning, with sufficient: size, floor surfaces, seating, writing surfaces, toilet facilities, ventilation, lighting, heating, access, exits, cleanliness, absence of distracting noise.

Course/Centre administration

Registering Learners

Centres must ensure Learners are registered in accordance with the guidance in *QA Centre Handbook*.

Certification

After a Learner has completed an assessment, unit or qualification whether they have passed or not, Centres must enter the details and assessment results on the QA Customer Portal at:

www.qualsafeawards.org

Centres will be given login details and guidance on using the QA Customer Portal when they are approved to deliver a QA qualification.

The Learner receives a certificate on achieving the qualification.

The certificate date is the date the Learner achieves the final unit. This qualification is valid for 3 years. The Learner needs to retake the qualification and the assessments before the end of the 3 years to remain qualified.

QA has developed a verification tool that means the validity of every certificate can be verified online. This verification tool can be found on the QA website.

Refresher training

Although this qualification is valid for three years, the UK Health and Safety Executive and Resuscitation Council UK recommends annual CPR knowledge/skills refresher training.

Delivery and support

Learner to Trainer ratio

To maintain the quality of teaching and assessment, make sure the class ratio is no more than 12 Learners to 1 Trainer. Never allow more Learners on the course than you can cater for during the assessments.

Delivery plan

QA provides Centres with a complimentary course programme and detailed lesson plans, which are carefully designed to meet the objective of this qualification and the needs of Learners, making sure Learners are adequately prepared for the assessments.

Centres not using QA lesson plans, which are created and provided free on qualification approval, must submit their own delivery plan and have it approved by us **before** delivering this qualification. Note: Charges may apply. The delivery plan should:

- Include a course timetable and detailed lesson plans, clearly showing the required subjects and criteria/learning outcomes are covered and the minimum 3 guided learning hours are met
- Be carefully designed to meet the objective of this qualification and the needs of Learners, making sure Learners are adequately prepared for the assessments
- Be emailed to: info@qualsafeawards.org

Learning materials

Centres must provide each Learner with suitable reference materials which cover the lesson plans and learning outcomes for this qualification. We recommend:

- *Emergency First Aid Made Easy* by Nigel Barraclough
- *CPR and AED First Aid Made Easy* by Nigel Barraclough

Centres can choose alternative books or other learning materials but these **must be approved** by Qualsafe Awards prior to use. Note: Charges may apply. Please refer to the *QA Fees and Charges List*.

Ongoing support

QA Centres should provide appropriate levels of support to Learners throughout the qualification. The purpose of the support is to:

- Assess knowledge and competence in relation to learning outcomes and the detailed assessment criteria of the unit within the qualification, see *Appendix 1*
- Give Learners feedback on their progress and how they might be able to improve

Assessment

Overview

The Qualsafe Level 3 Award in Adult BLS, AED and Management of Anaphylaxis (RQF) skills and knowledge should be taught and assessed in accordance with currently accepted first aid practice in the UK.

Methods

QA has devised externally set, internally marked assessment tools to make sure Learners are assessed against the required knowledge, skills and understanding, as detailed in the learning outcomes and assessment criteria shown in *Appendix 1*. Centres should download all assessment papers from the QA Customer Portal in advance of the course. For this qualification there are:

- **Practical assessments** – observed by the Trainer throughout the course, with the results of each learning outcome recorded on the practical assessment paperwork, see *QA Guide to Assessing Basic Life Support Qualifications*. There are 4 mandatory practical assessments for this qualification:
 - Adult CPR and safe use of an AED
 - CPR and AED considerations
 - Unconscious casualty
 - Management of anaphylaxis

There are 2 possible grades available of Pass or Fail. All mandatory areas of assessment must individually meet or exceed the required pass criteria/mark for the Learner to achieve this qualification.

Access to assessment

QA is committed to equality when designing the assessments for qualifications. Centres can make sure they do not unfairly exclude the assessment needs of a particular Learner by following the *QA Access to Assessment Policy* to determine whether it is appropriate to:

- Make a Reasonable adjustment or
- Request Special Consideration for the Learner

When a reasonable adjustment needs to be made, Centres should check the *QA Access to Assessment Policy* to see if the adjustment required needs prior approval or if the *Reasonable Adjustment Form* can be submitted retrospectively. If the adjustment requires prior approval, then Centres must complete a *Reasonable Adjustment Form* and send it to QA with any relevant supporting evidence at least five working days in advance of course delivery for review and approval. Centres should retain a copy of this form for their own records.

Learners may be eligible for special consideration if their performance through the assessment process has been affected by some temporary illness, injury or adverse set of circumstances. A *Special Consideration Request Form* should be completed and sent to QA within 5 working days of Learner assessment taking place, along with any supporting evidence (where available), for consideration and approval. Centres should retain a copy of this form for their own records.

Note: If you have any suggestions for improvements, please let us know.

Learners should be informed about the Centre's and QA's appeals and complaints procedures and how they can access these. Information about these procedures can be found in the *QA Training Commitment* which should be presented to Learners during their course.

Specific equality issues relevant to this qualification

It is important no Learner is turned away from a training course due to disabilities or impairments. However, to assess competence and gain certification, the Learner will need to demonstrate certain practical skills. For instance, for first aid qualifications the Learner must be assessed performing practical tasks such as CPR, as per *QA Guide to Assessing Basic Life Support Qualifications*. To pass the assessment, the Learner must demonstrate the required practical skills without assistance from a third party.

Informal record of achievement

If a Learner with disabilities cannot perform 1 or more of the practical tasks required, it may be possible for the Centre to provide a letter recording the learning outcomes that the Learner achieved. For example, a Learner may be able to demonstrate 'chest compression only CPR' and instruct a third party how to place a casualty in the recovery position. The letter should clearly state that "this record of achievement does **not** constitute a Qualsafe Level 3 Award in Adult BLS, AED and Management of Anaphylaxis (RQF)".

Assessment language

Assessment in British Sign Language (BSL) may be permitted for this qualification for the purpose of a Reasonable Adjustment. See *QA Access to Assessment Policy*.

Assessment in languages other than English may be permitted. However, the certificate issued could only be used to support a role in the workplace as long as proficiency in English is not required for the role supported by this qualification. See *QA Language Policy*.

Prior approval from QA is required before any assessment is delivered through BSL or a language other than English. Any request will be considered in terms of viability and there may be charges depending on the work required to meet the request, e.g. translating assessment papers.

If a Learner passes the assessment process in another language or through BSL, their certificate will show extra information, including the language of assessment and if required, confirmation of the context in which the certificate can be used.

Quality assurance

Centre internal quality assurance

The Centre is required to sample a reasonable amount of assessments as part of the quality assurance of the qualification. This standardisation of assessment across Learners and Trainers is to make sure there is fairness and consistency in assessment practices. Centres are required to adhere to QA's internal quality assurance requirements. Further details can be found in the *QA Centre Assessment Standards Scrutiny (CASS) Guidance*.

Centres must retain all Learner documents and records for a period of 3 years and make sure these are available for review by Qualsafe Awards or our representatives, e.g. External Quality Assurers (EQAs), on request.

Qualsafe Awards external quality assurance

QA operates a system of ongoing monitoring, support and feedback for approved Centres.

QA employs a risk-based model to decide the frequency of external quality assurance activity.

Further details of the QA external quality assurance programme are available in the *QA Centre Assessment Standards Scrutiny (CASS) Guidance*.

Appendix 1 – Qualification unit

The Qualsafe Level 3 Award in Adult BLS, AED and Management of Anaphylaxis (RQF) has 1 unit that Learners are required to complete in order to achieve the qualification.

Unit title:	Adult BLS, AED and management of anaphylaxis	
GLH:	3 hours	
Level:	3	
Learning outcomes <i>The Learner will:</i>	Assessment criteria <i>The Learner can:</i>	*Indicative content:
1. Be able to assess an emergency situation safely	1.1 Conduct a scene survey	Conducting a scene survey may include: <ul style="list-style-type: none">• Checking for further danger• Evaluating what happened• Prioritising treatment• Delegating tasks• Considering use of Personal Protective Equipment (<i>PPE</i>)
	1.2 Conduct a primary survey on a casualty	The primary survey sequence may include: <ul style="list-style-type: none">• Danger• Response• Airway• Breathing• Circulation/Chest Compressions/CPR <i>(Can be demonstrated as part of and in relation to the CPR demonstration).</i>
	1.3 Summon appropriate assistance when necessary	Summoning appropriate assistance may include: <ul style="list-style-type: none">• Shouting for help• Calling 999/112 via speakerphone or bystander• Leaving the casualty to call 999/112
2. Be able to provide first aid to an unresponsive casualty who is not breathing normally	2.1 Identify when to administer Cardiopulmonary Resuscitation (CPR)	Identifying when to administer CPR must include: <ul style="list-style-type: none">• When the casualty is unresponsive and:<ul style="list-style-type: none">◦ Not breathing◦ Not breathing normally/agonal breathing
	2.2 Demonstrate CPR using an adult manikin	Demonstrating CPR must include: <ul style="list-style-type: none">• 30 chest compressions<ul style="list-style-type: none">◦ Correct hand positioning◦ 5-6cm compression depth• 100–120 per minute

Learning outcomes <i>The Learner will:</i>	Assessment criteria <i>The Learner can:</i>	*Indicative content:
		<ul style="list-style-type: none">• 2 rescue breaths<ul style="list-style-type: none">◦ Correct rescue breath positioning◦ Blowing steadily into mouth, taking about 1 second to make chest rise◦ Taking no longer than 10 seconds to deliver 2 breaths• AED (<i>Defibrillator</i>)<ul style="list-style-type: none">◦ Correct placement of AED pads◦ Following AED instructions <p>CPR – minimum demonstration time of 2 minutes at floor level. During CPR demonstration, the Learner should consider the risk of infection, which may include:</p> <ul style="list-style-type: none">• Personal Protective Equipment (<i>PPE</i>)• Barrier devices during rescue breaths
	2.3 Identify other considerations when administering CPR and using an AED	Other considerations may include: <ul style="list-style-type: none">• Modifications to adult CPR for children and infants• Pad placement on children and infants• Infant and child AED settings/variances• Ensuring that no one is touching the casualty during analysis and shock• Recognition and actions to take for regurgitation• Circumstances when it is acceptable to pause/stop CPR• Clothing removal• Excessive chest hair• Pregnancy• Rescue ready kit (<i>razor, scissors, towel, PPE</i>)• Implanted pacemaker/defibrillator• <i>Wet chest/wet surface</i> (it is okay to deliver a shock if the casualty is on a wet or metal surface)• Medical patches (<i>e.g. GTN patch</i>)• Jewellery• Moving machinery/vibrations• Explosive atmosphere
3. Be able to provide first aid to an unresponsive casualty who is breathing normally	3.1 Identify when to place a casualty into the recovery position	Identifying when to place the casualty into the recovery position should include when the casualty has lowered levels of response and: <ul style="list-style-type: none">• Does not need CPR• Is breathing normally• Is uninjured <p>An injured casualty may be placed in the recovery position if the airway is at risk (<i>e.g. fluids in the airway or you need to leave the casualty to get help</i>).</p>
	3.2 Demonstrate how to place a casualty into the recovery position	Placing a casualty into the recovery position may include: <ul style="list-style-type: none">• Placing in a position that maintains a stable, open, draining airway at floor level• Continually monitoring airway and breathing• Turning the casualty onto the opposite side every 30 minutes• Placing a heavily pregnant casualty on their left side

Learning outcomes <i>The Learner will:</i>	Assessment criteria <i>The Learner can:</i>	*Indicative content:
	3.3 Demonstrate continual monitoring of breathing whilst the casualty is in the recovery position	Continually monitoring airway and breathing includes continual checking for normal breathing to ensure that cardiac arrest can be identified immediately.
4. Be able to provide first aid to a casualty with anaphylaxis	4.1 Recognise suspected anaphylaxis	Recognising anaphylaxis may include rapid onset and rapid progression of a life-threatening airway, breathing and/or circulation problem: <ul style="list-style-type: none">• Airway – Swelling of the tongue, lips or throat• Breathing – Difficult, wheezy breathing or tight chest• Circulation –<ul style="list-style-type: none">◦ Dizziness, feeling faint or passing out◦ Pale, cold, clammy skin and fast pulse◦ Nausea, vomiting, stomach cramps or diarrhoea• There may also be a skin rash, swelling and/or flushing Training should cover common triggers for anaphylaxis.
	4.2 Identify how to administer first aid for a casualty with suspected anaphylaxis	Administering first aid for anaphylaxis may include: <ul style="list-style-type: none">• Calling 999/112• Correct casualty positioning• Assisting the casualty to use their adrenaline auto-injector• Resuscitation if required
	4.3 Demonstrate the use of a 'training device' adrenaline auto-injector	The use of a 'training device' adrenaline auto-injector: must be demonstrated using a training device and NOT a live auto-injector.

Additional information about the unit	
*Indicative content	The purpose of the indicative content in this unit is to provide an indication of the context behind each assessment criteria. This is not intended to be exhaustive or set any absolute boundaries
Simulation	Simulation is permitted in this unit for practical assessments.

Note: Full and detailed qualification content is available to approved Centres in the form of lesson plans which are provided free of charge.

Appendix 2 – Occupational knowledge, competence and experience

Occupational knowledge, competence and experience

All Trainers, Assessors and IQAs must have occupational knowledge and competence in first aid.

Acceptable evidence includes:

- Holding a current First Aid at Work certificate issued by an Ofqual/SQA Accreditation/Qualifications Wales/CCEA Regulation recognised Awarding Organisation/Body (or equivalent*) **or**
- Holding a current Offshore First Aid Certificate issued by a HSE approved training provider **or**
- Current registration as a Doctor with the General Medical Council (GMC)** **or**
- Current registration as a Nurse with the Nursing and Midwifery Council (NMC)** **or**
- Current registration as a Paramedic with the Health and Care Professions Council (HCPC)**

*recognised First Aid at Work certificate equivalents must be submitted to QA with comprehensive mapping which evidences that all assessment criteria of the FAW qualification have been achieved within the past 3 years. Equivalent qualifications without an expiry date and achieved more than 3 years ago will require additional evidence to be submitted of up to date competence in First Aid.

**registered healthcare professionals must act within their scope of practice and therefore have current expertise in first aid to teach/assess the subject.

Teaching experience

All Trainers must have experience in teaching first aid. Acceptable evidence includes either of the following options:

- A 36-hour log of teaching first aid within 3 years, which must include one of the following (or equivalent) delivered within the last 6 months:
 - 1 Emergency First Aid at Work,
 - 1 First Aid at Work,
 - 1 Paediatric First Aid, **or**
- A record of being observed by a qualified/approved Trainer within 12 months, during which practical and theoretical topics were delivered competently for a duration of 6 GLH

Assessing experience

All Assessors must have experience in assessing first aid. Acceptable evidence includes either of the following options:

- A log of performing assessments on 6 first aid courses within 3 years, **or**
- A record of being observed by a qualified/approved Assessor within 12 months, during which 4 practical and 1 theoretical assessment were delivered competently

Appendix 3 – Acceptable training/assessing qualifications

This list is not exhaustive but provides a guide to acceptable training and/or assessing qualifications. Trainers who also assess Learners' competence must hold a qualification (or separate qualifications) to enable them to perform both functions.

Qualification	Train	Assess
CURRENT QUALIFICATIONS <i>(available for new trainers/assessors to undertake):</i>

Regulated qualifications based on the Learning and Development NOS 9 Assess Learner Achievement		√

Note: Assessors who do not hold a formal assessing qualification may alternatively attend *First Aid Assessor CPD Training* with an Awarding Organisation/Body.

Appendix 4 – Qualifications suitable for internal quality assurance

This list is not exhaustive but provides a guide to acceptable IQA qualifications:

L&D Unit 11 Internally Monitor and Maintain the Quality of Workplace Assessment SCQF Level 8 (SQA Accredited)
Level 4 Award in the Internal Quality Assurance of Assessment Processes and Practice
Level 4 Certificate in Leading the Internal Quality Assurance of Assessment Processes and Practice
Conduct the Internal Verification Process SCQF Level 8 (SQA Unit)
Regulated qualifications based on the Learning and Development NOS 11 Internally Monitor and Maintain the Quality of Assessment
V1 Conduct Internal Quality Assurance of the Assessment Process or D34 Internally Verify the Assessment Process
Internally Verify the Assessment Process SCQF Level 8 (SQA Unit)

Note: IQAs who do not hold a formal internal quality assurance qualification may alternatively attend *Internal Quality Assurance CPD Training* with an Awarding Organisation/Body.
